THE "TRAIN STOP."

Novel Automatic Device to Prevent Railway Accidents.

No more railway disasters, no more head on collisions, no more accidents at trolley crossings—this is the promise for the future held out by Professor H. G. Sedgwick, a mechanical expert and inventor who has lately been showing to railway managers in New York an automatic appliance which he calls a "train stop," writes Joseph Ray Buchanan in Harper's Weekly.

In actual service Professor Sedgwick's appliance will stop a train by automatically setting the brakes and will also display a sign or "telltale" informing the engineer of the particular danger ahead of him, whether an open switch, another train on the track or a washed out bridge. A system of iron boxes set beside the tracks holds the mechanism which performs the surprising feat of the "train stop."

A Seasonable Suggestion

Soda Water

Is always "in season." Whether taken hot or cold it is a wholesome beverage provided the flavoring syrups are all right. Cold Soda drawn from our good fountain lacks nothing that could be desired by the most sensitive palate. We use only pure juices made direct from fresh fruits and can give varied flavors. Our "Cold Soda" is always cold.
